

Although the etymology of *mystērion* is not entirely clear, scholars have traditionally thought it to be derived from the Greek *muō*, meaning “to close” or “to shut.” The word may thus refer to shutting not only the eyes (during the initiation ritual), but also the mouth, since initiates were not allowed to reveal what happened in the ritual. Nevertheless, the mysteries were probably not as esoteric as scholars have thought (see R. Turcan and W. Burkert).

While scholars have, in the past, treated a variety of cults as mysteries, nowadays they operate with a stricter definition of the term. “Mysteries” designate, first, ancient Greek mysteries (the Eleusinian, the Dionysian and the Orphic-Bacchic Mysteries) and, secondly, new mystery cults worshipping divinities that Greeks and Romans adopted gradually from other cultures (Cybele, Isis and Mithra). Mysteries supplemented civil religion rather than competed with it: they had the same goal of creating an individual relationship to deities through votive offerings. Any individual could easily observe the rites of the state religion, be an initiate in one or more mysteries (whatever her/his status might be), and at the same time adhere to a certain philosophical school.

A variety of inscriptions, inscribed instruments, ritual objects, iconographic representations, and texts all attest to the importance of music and sound in mysteries. For instance, the rattling noises in the cults of Dionysos and Cybele were imbued with magical and protective qualities. The archaeological remains of a *mithraeum* in Strasbourg (Koenigshoffen – the very site of our conference) give an opportunity to reflect more precisely on the sounds heard in Mithraic mysteries, in which initiates imitated the cries of ravens and the roaring of lions. The representation of a sistrum on a mosaic in the *mithraeum* in Ostia suggests that there were sonic connections between the mysteries of Isis and Mithra.

The recent discoveries of golden tablets related to the Orphic mysteries shed new light on those rituals and their conception of the afterlife. The connection of the tablets with Pythagoreanism should be explored, since both try to understand the secrets of the universe. The theory of the harmony of the spheres is a way to decipher the sounds of the beyond, the inaudible music that rules the *kosmos*. Gaudentius made this clear at the very beginning of his *Introduction to Harmonics* by quoting a famous Orphic statement: “I sing for the intelligent; uninitiated, close the door!”

Since there has never been any full enquiry into the soundscape of mysteries, there is need for close examination of this rich material. A variety of questions arise, in particular:

- what role did music and sound play in the ritual for a new initiate?
- what role did initiates attribute to music and sound in the afterlife?
- how do we access a sound that was supposed to remain secret to all but the initiates?
- what does the corpus of Orphic Hymns contribute to our understanding of the soundscape of the mysteries?
- how does music theory try to explain the secrets of the universe?
- how has the music of mysteries been re-imagined by modern composers (e.g. Mozart’s *Magic Flute* (1792), G. S. Mayr’s *I misteri eleusini* (1802) and Y. Markopoulos’ *Liturgy of Orpheus* (1994))?

The Sounds of the Beyond: The Mysteries of Ancient Greek and Roman Music

Les sons de l'au-delà : les mystères de la musique grecque et romaine

Monday, June 27th

8.30-9.00	Welcome
9.00	Conference opening
9.30-10.30	Keynote Lecture E. Pöhlmann (U. Erlangen) Menander, <i>Theophrastus</i> . A Song to Kybele on the Comic Stage
10.30-11.00	Coffee Break
11.00-13.00	Eleusinian Soundscapes from Pre-Classical to Classical Greece T.-L. Altunin (U. Oxford) Ritual Soundscapes in the Homeric Hymns to Apollo and Demeter F. Buè (EPHE, THEMAM – Paris Nanterre, Collège Stanislas) Eleusinian Sounds behind the Victory Odes A. Provenza (U. Palermo) Lighted Sounds. Mystic Soundscape in Pindar's Dithyramb II (fr. 70b S.-M.) and Tragedy M. Anderson (Washington U., Saint Louis) Ritual Dance in the Eleusinian Afterlife (Aristophanes, <i>Frogs</i> , 312-459)
13.00-14.00	Lunch break
14.30-16.00	The Soundscape of Roman Mystery Cults R. Sears (Washington U., Saint Louis) – On line presentation What Can Poetry Tell Us About Musical Practice in Rome? Ovid's Representation of the Sound of Mystery Cult Music K. Wysłucha (Austrian Academy of Sciences) What did the Music of Mystery Cults Sound Like? Ancient Written Sources on the Reception of Ritual Music J. Günther (U. Göttingen) – F. Leitmeir (U. Würzburg) Mysterious Noises – The Soundscape of the Frieze of the <i>Villa dei Misteri</i>
16.00-16.30	Coffee break
16.30-17.00	Ancient Notation and Digital Humanities C. Terzis (Austrian Academy of Sciences) Caught in the mysteries of the ancient notation system: the project DiAGRAM
17.00-19.00	Workshops (B. Brown, U. Cambridge / Royal Conservatoire of Scotland) 1. Pindar, Pythian 12: a practical experiment re-assessing the Plutarchian explanation of the <i>trimelēs nomos</i> 2. Befriending the Berlin <i>aulos</i> : insights arising from trials executing Hagel's 2010 interpretation

Tuesday, June 28th

9.00-10.30	Material and Iconographical Evidence A. Zangrando (U. Bologna) – On line presentation Musical Presence in the Cults of Magna Mater and Attis: Archaeological and Epigraphic Evidence from Trieste and Aquileia S. Perrot (CNRS, U. Strasbourg) Remains of Sound Instruments from Sanctuaries with Mystery Cults in the RIMAnt Database F. Vergara Cerqueira (U. Pelotas) Apulian Sistrum and Death in Italiot Vases (4th cent. B.C.)
10.30-11.00	Coffee break
11.00-12.00	Movie "Music of Ancient Greece" (B. George, 2021, O2B / CNRS / Arte)
12.00-14.00	Lunch break
14.00-16.00	General Assembly
16.00-16.30	A Tribute to Andrew Barker by F. Buè and E. Rocconi (U. Pavia)
16.30	Visit to the Neustadt and Palais Universitaire
20.00	Concert (Palais Universitaire) "Music beyond Borders, from Antiquity to Today"

Wednesday, June 29th

9.00-10.00	Keynote lecture M. Steinhilber (U. Fribourg) Syllables between Rhythmic Function and Duration: Approaching some Orphic Foil Tablets
10.00-10.30	Coffee Break
10.30-12.30	Approaching New Mystery Worlds K. Kolotourou (Royal Holloway) The Cymbals of Adrasteia A.-I. Muñoz (U. Fribourg) Isis and the Syria Dea, Symphony and Dissonance C. Romero Mayorga (U. Reading) Heavenly Mithraic Music A. Kramarz (U. Notre Dame, IN) Cosmical Music or Musical Cosmos? The "Copernican Turn" of Aristides Quintilianus
12.30	Concluding remarks
13.00-14.30	Lunch break
16.00	Visit to the Archaeological Museum, Palais Rohan
18.30	Final concert Silbermann-Organ concert in St-Thomas' Church (organist: C. Morath)
